

WIRE EDM

Modified Technologies' Wire EDM department goes hand-in-hand with our commitment to technology. Our Wire EDM machines, complete with an automated pallet system, enables us to run lights-out machining 24 hours a day, 7 days a week. We can wire EDM details as large as 14" x 20" x 12" thick. The Wire EDM machines are also equipped with the latest in cutting software to ensure the fastest, most accurate wire technology available. This means faster turn around time for you, the customer.

CNC

Modified Technologies' CNC department has Vertical Machining Centers that offer the high performance 3-D machining that is necessary to be a "World Class" tool and die shop. We utilize the latest in cutting tools for optimal performance in metal removal.

MATERIALS WE CUT:

Carbon - .010" to .625" thick

Alloy - .010" to .375" thick

Stainless - .010" to .375" thick

Aluminum - .010" to .187" thick

We stock many standard materials to meet our customers' immediate delivery requirements.
